Summary

Software Engineer with 5+ years of experience specializing in backend development using Java, Spring Boot, and Microservices. Skilled in designing scalable systems, APIs, and database architectures, with additional experience in frontend development using ReactJS. Passionate about building reliable, high-performance applications and continuously learning new technologies. Additionally, have 2 years of experience mentoring junior developers, helping them grow while contributing to overall team success.

Skills

Programming Languages: Java, Python, JavaScript, Golang

Backend & Frameworks: Spring Boot, Spring Security, Hibernate, Spring Data JPA, Microservices, Javalin, WebSocket, Apache Kafka, GraphQL, Redis Cache, Swagger, JWT, OAuth 2.0, JUnit, Mockito

Databases: MySQL, PostgreSQL, MS SQL, SQLite, DynamoDB, InfluxDB

Frontend & Frameworks: HTML, CSS, ReactJS

Cloud & DevOps: AWS, Docker, Kubernetes, Terraform

Version Control & Tools: GitLab, GitHub, Bitbucket, Jira, ClickUp, Maven, Gradle

Work Experience

Cloudly Infotech Limited, Dhaka

January 2025 – Present

Senior Software Engineer

- Built a Javalin and Spring Boot IoT platform to monitor thousands of industrial refrigeration sensors in real time, reducing manual inspections and preventing costly breakdowns.
- Developed a real-time dashboard with live and historical graphs; enabled 1-second interval data exports under 2 seconds via WebSocket, improving operational decision-making 5× faster.
- Implemented alert mechanisms and optimized SQLite and InfluxDB pipelines, achieving 99.9% uptime and millisecond-level query performance.
- Mentored junior teammates, assisting their development and collaborating on the project's architecture for scalable and maintainable design.
- **Tech Stack:** Java, Javalin, Spring Boot, SQLite, InfluxDB, JUnit

Adventure Dhaka Limited, Dhaka

Senior Software Engineer

June 2024 – December 2024

Software Engineer

June 2023 – May 2024

- Developed sign-up and login modules for the travel booking platform, ensuring secure authentication and smooth user onboarding.
- Designed and implemented the hybrid Localization Module (Adventure Dhaka Limited) with dynamic multilingual text and multi-currency support; optimized queries with Redis caching, reducing server load, improving response time, and cutting localization costs by up to 40%.
- Optimized hotel booking by integrating third-party APIs (Agoda, Expedia, Rakuten), caching frequently used data locally, and making API calls on demand, improving system efficiency and reducing operational overhead.
- Managed large-scale data storage and retrieval in PostgreSQL, ensuring fast, reliable queries.
- Mentored junior team members and assisted supervisors in making critical decisions.
- **Tech Stack:** Java, Spring Boot, PostgreSQL, MySQL, Redis, Microservices, Kafka

Synesis IT LTD, Dhaka

June 2020 – May 2023

Programmer

- Developed a video conferencing application (Convay Project) using React and Spring Boot with a microservices architecture, handling both frontend and backend development.
- Implemented meeting management features including scheduling, history, and detailed meeting information tracking.
- Optimized backend Spring Boot code to utilize API responses efficiently, improving application performance and scalability.
- **Tech Stack:** Java, Spring Boot, React, MySQL, Microservices

Teaching Assistant

- Mentored 350+ students in courses including CSE 173 – Discrete Mathematics, CSE 215 – Object-Oriented Programming, CSE 311 – Database Systems, and CSE 327 – Software Engineering, guiding them in programming, database design, and algorithm concepts.
- Created, evaluated, and provided feedback on assignments to strengthen students’ technical skills and problem-solving abilities.
- Assisted faculty with managing examinations, grading workflows, and course-related administrative tasks.

Education

Bachelor of Computer Science and Engineering (BSc CSE)

CGPA: 3.77/4.00

January 2016 – May 2020

North South University, Dhaka

Higher Secondary Certificate (HSC)

GPA: 5.00/5.00

2015

National Ideal College, Dhaka

Secondary School Certificate (SSC)

GPA: 5.00/5.00

2013

National Ideal School, Dhaka

Project Work

- **Weather and Rainfall Prediction:** Built a predictive model for rainfall and weather conditions using machine learning. Implemented and compared multiple regression algorithms. Utilized tools such as Python (scikit-learn) and Weka for data preprocessing, training, and evaluation.
- **Facebook Group Clone Website:** Created a social platform clone with ReactJS frontend and Spring Boot backend. Supported group chats, events, and meetings with MySQL backend.Optimized API endpoints for smooth real-time interactions.
- **Foodie Website:** Developed a fully responsive restaurant management platform. Implemented CRUD operations (add, delete, update restaurant data). Built with ReactJS + Spring Boot, ensuring efficient backend queries.
- **E-commerce Cart System:** Built a shopping cart with ReactJS + Spring Boot. Features: dynamic pricing, order tracking, and API integration with payment gateways.

Awards and Certificates

- Achieved **Magna Cum Laude** distinction for outstanding undergraduate performance.
- Received a merit-based **Financial Scholarship**, covering 75% of tuition expenses.
- Granted a **Board Scholarship (General Category)** based on HSC performance.
- Earned a **Board Scholarship (Talent-pool Category)** for exceptional performance in the JSC exam.
